ACCESS CONTROL

We provide a range of fully automated, easily deployable, remotely monitored, highly secure and centrally managed real-time access control services to cater for any bespoke single or multiple site access management requirements.

SYSTEMS DYNAMIC EQUIPMENT

We provide contact-based and contact-free access control systems with single or multiple authentication modes that can be integrated with a range of health and safety systems like alarms and security cameras to suit any site requirement.

- Face Authentication
- Centralised Database
- Fingerprint Authentication
- Mobile App Access
- ID Card Authentication
- Live Event Monitoring
- Mobile Authentication
- Report Generation
- Remote Enrollment
- Secure Transmission

FEATURES

SMART FUNCTIONALITY

Our systems use deep machine learning biometric, card and mobile authentication methods to authorise approved personnel with the help of highly secure and centrally managed site access management software solutions.

APPLICATION MULTIPLE SOLUTIONS

We are able to offer a range of authentication, authorisation and accountability solutions with a single deployment of our hardware and software access control systems to help valuable save time, money and resources.

- Personnel Management
- Accreditation Management
- Time & Attendance Management
- Temperature Management
- Delivery Management
- Face Mask Management
