FIRE PREVENTION

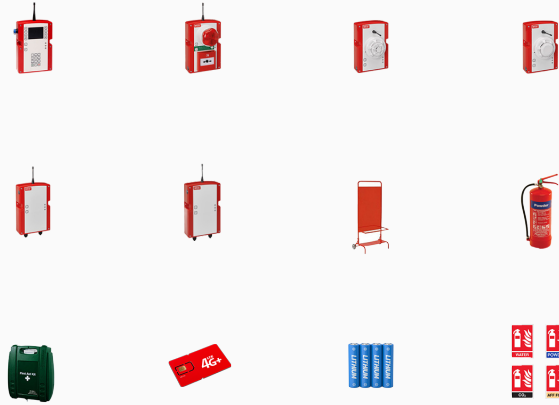

FIRE PREVENTION

We deploy scalable battery operated wireless fire safety systems which deliver vital environmental health and safety services designed to protect industrial properties, construction sites and heritage buildings from potentially devastating events.

SYSTEMS SCALABLE DESIGN

We offer easily deployable highly scalable industry certified battery operated wireless systems that can operate in harsh working environments and withstand adverse weather conditions presented by temporary construction sites.

 Wireless Technology

 Mobile App Access

 Battery Operation

 Report Generation

 Inspection Delay

 Live Event Monitoring

 Pre-Alarm Functions

 Secure Transmission

 Modular Build

 Tamper Detection

FEATURES

SIMPLE APPLICATION

Our fire and medical alert systems are flexible, scalable and very easy to deploy making them the preferred option for ever-changing building environments like temporary construction, alteration or refurbishment sites.

APPLICATION MULTIPLE SOLUTIONS

Our battery powered wireless alarm systems can be used in a variety of temporary construction or building environments to provide quick and easy ways to respond to fire and medical emergencies.
