INTRUSION DETECTION

# INTRUSION DETECTION

We deploy extremely flexible remotely monitored wire free battery operated intrusion detection systems that will easily protect small to medium-sized sites that may not have any power to accommodate more sophisticated security systems.

## SYSTEMS PORTABLE INNOVATIONS

Our wireless systems are light, simple and quick to install making it extremely easy to effectively secure an uncontrolled or unmanned site at very short notice or for a period of time before more permanent structures can be put in place.

 Wireless Technology

 Mobile App Access

 Battery Operation

 Report Generation

 Motion Detection

 Live Event Monitoring

 Video Notification

 Secure Transmission

 Modular Build

 Tamper Detection

## FEATURES

# ADAPTABLE OPERATION

Our battery operated wireless intrusion detection systems extremely flexible, modular and very easy to deploy making them the preferred choice in effectively securing vacant areas, vulnerable property and sites without power, fencing and lighting.

## APPLICATION

# MULTIPLE SOLUTIONS

Our battery powered wireless alarm systems can be used in a variety of temporary construction or building environments to provide quick and easy ways to respond to intruder emergencies.
