# VIDEO SURVEILLANCE

Our video surveillance or CCTV service allows us to simultaneously monitor multiple remote sites over a secure internet connection using systems with deep machine learning and AI technologies to accurately detect and prevent crime.

## SYSTEMS PROVEN RELIABILITY

We deploy a wide range of extremely reliable video surveillance systems with all the latest technology that will not only proactively protect your site but also be able to withstand very harsh weather and working environments.

- High Quality Footage
- Line Crossing
- Low Light Vision
- Facial Recognition
- Motion Detection
- Intrusion Detection
- Tamper Detection
- Live Event Monitoring
- Mobile App Access
- Secure Event Storage

## FEATURES

# ADVANCED CAPABILITIES

Our industry leading smart camera systems are equipped with deep learning AI technologies that integrate a range of tools to help accurately detect potential intrusions, reduce false alarms and improve the overall communication process.

## APPLICATION MULTIPLE SOLUTIONS

We are able to offer a range of value-added site based solutions with a unique blend of integrated video surveillance systems to save time, money and resources by meeting more than one specific requirement at the same time.

- Perimeter Protection
- Temperature Screening
- Time Lapse Photography
- Fly Tipping Prevention
- Fire Detection
- Hard Hat Detection

Perimeter Breached
